Technical Support	Testing and Quality Assurance	Problem Resolution

EDUCATION:

Software Engineering - Artificial Intelligence — Expected Graduation: April 2028
Centennial College, Toronto, ON — GPA 4.34
Relevant studies: C# Programming, Python Programming, JavaScript Programming, SQL, Software Requirements

PROJECTS:

MiddleGround AI — July 2024
Personal project
- Built and deployed an AI-powered application that generates compromise suggestions to help users navigate disagreements, using Cloudflare Workers and Meta Llama 3.1.
- Implemented multi-provider authentication for secure account creation and personalized user experiences.

Moonraker Studios Website — March 2024
Moonraker Studios, Toronto, ON
- Developed and deployed a fully responsive recording-studio website using Next.js, React, Tailwind CSS and TypeScript on Vercel.
- Built a custom audio player with interactive controls to improve how visitors explore the studio portfolio.

RELEVANT EXPERIENCE:

Technical Support Specialist and Web Developer — Aug. 2024 - Present
World Ruby Foundation, Toronto, ON - Remote
- Provide technical support to non-technical team members for web hosting, domains, Google Workspace, and related digital tools.
- Customize Next.js front-end elements to improve branding and user experience, while coordinating payment-processing integrations with external partners.

Web Developer — June 2021 - June 2022
LVNDR TALES, Toronto, ON - Remote
- Customized a Shopify theme to strengthen the company's branding, responsiveness, and overall user experience.
- Integrated tools for product reviews, social media, and email marketing while applying SEO and performance improvements.

Web Developer — Jan. 2020 - Sept. 2021
RCR Studios, Toronto, ON - On-site
- Customized a WordPress theme to present the recording studio's services and portfolio through a professional, user-friendly website.
- Improved search visibility and integrated an audio player, photo galleries, booking tools, and client testimonials.

OTHER EXPERIENCE:

Printing Press Operator — 2025 - Present
Camad, Toronto, ON
- Prepared digital layouts, calibrated equipment, performed maintenance and verified production quality against job specifications.

Audio Engineer — 2021 - Present
Moonraker Studios, Toronto, ON
- Handled audio equipment setup and communicated effectively with clients to deliver high-quality results.
